	Website Update with daily results, news, photos and stories	12noon 5.00pm	Office*	

IT SUPPORT – Notes:

Transplant Australia is looking for IT Support for the 2010 Transplant Games in two areas.

Laptop PDF* - This is mainly to do with helping us record event results at the individual events. Results will be delivered to the IT Support person who, using a laptop provided by Transplant Australia, will record the result in prepared “intelligent” PDF forms which are “submitted” on completion and emailed (using AIS WIFI or Vodafone USB Dongle) to the central Games Office.

These results will be collated in the Games office so that IT volunteers on duty there can update the www.australiantransplantgames.com website as results arrive.

Office* - IT volunteers who nominate they would like to help out in the Games Office (at the AIS) will be asked to upload the medal results to prepared website pages and to activate these pages as soon as the results are known and entered. TA uses a CMS created by BlueArc of Sydney called Ignition Suite. This is a very simple system to use and Volunteers will be given hands-on experience before the Games.

In addition, we will be asking the IT Volunteers to help uploading daily news items, photos and newsletters/ news releases prepared by our Media Staff and Volunteers.

Hardware and Software support for the Games has kindly been donated by **Datacom** and we will be using workstations and laptops donated by **Lenovo** Canberra.
